

*In the Specification*

Please amend the paragraph beginning at page 1, line 5 as follows:

91 -- The following U.S. patent applications filed concurrently herewith are assigned to the same assignee hereof, contain subject matter related, in certain respect, to the subject matter of the present application and are incorporated herein by reference:

U.S. Patent application ~~S/N \_\_\_ filed \_\_\_~~ S/N 09/496,283  
filed 19 June 2000 for "System and Method for Providing  
a Distributable Runtime", ~~assignee docket number LOT9~~  
~~2000-0005~~;

U.S. Patent application ~~S/N \_\_\_ filed \_\_\_~~ S/N 09/596,282  
filed 19 June 2000 for "System and Method for  
Downloading Security Context Elements Governing  
Execution of Downloadable and Distributable Agents",  
~~assignee docket number LOT9-2000-0012~~;

U.S. Patent application ~~S/N \_\_\_ filed \_\_\_~~ S/N 09/596,963  
filed 19 June 2000 for "System and Method for Selective

Replication of Databases Within a Workflow, Enterprise,  
and Mail-Enabled Web Application Server and Platform",  
~~assignee docket number LOT9-2000-0004;~~

U.S. Patent application ~~S/N~~ filed S/N 09/597,997  
filed 19 June 2000 for "System and Method For Providing  
a Distributable Runtime That Deploys Web Applications  
and Services From a Workflow, Enterprise, and Mail-  
Enabled Web Application Server and Platform", ~~assignee~~  
~~docket number LOT9-2000-0003;~~

U.S. Patent application ~~S/N~~ filed S/N 09/596,783  
filed 19 June 2000 for "System and Method for Managing  
Concurrent Scheduled or On-demand Replication of  
Subscriptions", ~~assignee docket number LOT9-2000-0006;~~  
and

U.S. Patent application ~~S/N~~ filed S/N 09/596,845  
filed 19 June 2000 for "A System and Method for  
Developing and Administering Web Applications and  
Services From a Workflow, Enterprise, and Mail-Enabled  
Web Application Server and Platform, ~~assignee docket~~  
~~number LOT9-2000-0010.--.~~

Please amend the paragraph beginning at page 75, line 8, as follows:

---

Q2 -- In step 468, ~~he~~ the name of the custom service file is entered in the "Custom Services to install offline" field. This field is located on the Services page of the Offline Subscription Configuration profile document 138.--.

---

Please amend the paragraph beginning at page 13, line 15, as follows:

---

Q3 -- Domino ~~Online~~ Offline Services (DOLS) 62 provides an enhancement to the Domino server and platform 60 to allow distributed computing and remote execution by iNotes client 66 of Domino web applications and distributed computing and remote execution of the QuickPlace applications.--.

---

Please amend the paragraph beginning at page 13, line 20, as follows:

-- Domino ~~online services~~ Offline Services (DOLS) 62 is used by a web site administrator to configure Internet Notes (iNotes) clients to auto download from server 60, thus providing iNotes clients with web access using HTTP with

AB various browsers, and with local processing and replication.---

---

Please amend the paragraph beginning at page 147, line 4, as follows:

---

A4 -- A workflow, enterprise, and mail-enabled application server and platform supports distributed computing and remote execution of web applications. Lotus Domino ~~online services~~ Offline Services (DOLS) is used by a web site administrator to configure Internet Notes (iNotes) clients to auto download from server, thus providing iNotes clients with web access using HTTP with various browsers, and with local processing and replication. A local run time model comprises a hierarchy of models including object data store model, security model, indexing model, replication model, agent workflow model and mail model. DOLS provides a layered security model that allows flexibility for controlling access to all or part of an application. The highest level of security is managed through a database access control list (ACL). Further refinements within the security model provide access to specific documents, and their views, forms or folders, and include read access lists, write access lists, form access lists and readers and
